Contact Details

Instructor: Professor Kris Olds  
Office: Rm. 346 Science Hall  
Schedule: Mondays 3:30-6:00 pm, 350 Science Hall  
Office Hours: Fridays 1:30-3:15 pm, or by appointment (346 Science Hall)  
Tel: (608) 514-2265 (mobile)  
Email: olds@geography.wisc.edu

Overview

This new ‘special topics’ course focuses on current debates and thinking about cities, universities & the development process. Particular attention will be paid to the role and impact of hard & soft forms of infrastructure (e.g., interdisciplinary research spaces, intellectual property licenses, traffic command centers, the digital cloud), platforms (e.g., Airbnb, Amazon), expertise (e.g., biomedical, bibliometric, engineering), authorities (e.g., Elsevier, Google), and practices (e.g., benchmarking & ranking) on our changing cities and universities.

Course readings, discussions, a role-playing exercise, and select on- and off-campus site visits will be used to help us better understand these important phenomena.

Assessment will be based upon completion of assigned readings, participation in course activities (including four book reviews, to be shared with your colleagues), and the development of a research-based paper or blog or website on a relevant topic of your choice.

Please note that this is a truly interdisciplinary course, and I am happily open to students registering in it from virtually any discipline. I would also like to reinforce that that this course is designed for students with wide ranging geographical and historical foci. For example, lessons from the texts we read and sites we visit can be applied to the development and implementation of your own research project in other world regions or historic periods.

Readings and Schedule

This course is involves two very different, yet complementary modes of activity to enhance learning gain: (a) reading and discussions, and (b) field site visits. The purpose of utilizing this approach is to help bring the nature of complex phenomena to life by seeing and feeling/sensing, for example, new spaces of knowledge production, the world’s largest
medical record company’s campus, and the institutional-organizational unit (and people) that protects you from relentless cyber-attacks targeting our campus infrastructure on a daily basis. And in last week of the term we’ll learn about world university rankers and ‘organizational disambiguation’ being driven by market and branding logics but then shift over, half-way through class, to a small campus office where the ‘open’ agenda (with respect to teaching and learning) is being furthered via the utilization of a platform to publish Creative Commons-licensed open texts. These two modes of activity are designed to be interdependent, and also ensure the course provides you with an opportunity to get to know your own campus and the Madison city-region better.

The course schedule is outlined below. Making the decision about what readings to assign, and which sites to visit, was a very challenging one given all the fascinating options.

The assigned articles and books are either freely available on the websites I linked to below, or in Helen C White Library on two hour loan. Some are freely available as e-texts too – see:

https://lcp.library.wisc.edu/viewer/show/57165

I have also provided Project Muse links to two of the books that provide, when you are on campus, free access to two of the books (The Prehistory of the Cloud; The Fabric of Space). On Project Muse:

https://muse.jhu.edu/about/

The four books are also available for purchase via the usual sources (direct from the publisher, Amazon, etc.). Please note that I have attempted to ensure that the selected books are relatively cheap, and/or in paperback form. Two (see above) are freely available as well.
**SCHEDULE**

**Week 1**

*Note:* term does not start until Wednesday 6 September.

**Week 2: September 11**

**Infrastructure**

*Scan:* Issue 7 (July 2016) of *Limn*, especially the ‘Preface’ and ‘Rebuilding by Design in Post-Sandy New York.’ Links:

- [https://limn.it/issue/07/](https://limn.it/issue/07/)
- [https://limn.it/preface-public-infrastructures-infrastructural-publics/](https://limn.it/preface-public-infrastructures-infrastructural-publics/)

**Platforms**

*Scan* these two short online articles:

Gillespie, Tarleton (2017) Is “platform” the right metaphor for the technology companies that dominate digital media?, *Nieman Lab*, 25 August.

**Week 3: September 18**

*Note:* We will visit UW-Madison’s Cybersecurity Surveillance and Operations Center as well as meet with Bruce Maas, Emeritus Chief Information Officer, UW-Madison. The meeting begins in Computer Science (CS) 2147, 1210 W. Dayton St., at 3:30 pm. Please leave yourself enough time to get to the building which is located next to Union South. My mobile number is (608) 514-2265 so text me if you get lost on the way and need navigation help.

**Reading/scanning recommendations from Bruce:**

Paul Barford's mapping of the Internet

[https://www.internet2.edu/products-services/advanced-networking/](https://www.internet2.edu/products-services/advanced-networking/)
Internet2 Research and Education network. For example, all the data from the Large Hadron Collider projects in Geneva are processed through HTCondor at Wisconsin. At one point, we had a sustained burst for 30 minutes of 92 gbps (gigabits per second). Imagine all the parts that need to work right for that to happen.

http://er.educause.edu/articles/2014/1/speeding-up-on-curves
Brad Wheeler, co-founder of Unizin (that chose Canvas) writes about digital scale and change.

http://er.educause.edu/articles/2014/8/questions-of-data-ownership-on-campus
2 authors were UW employees and one was a UW PhD candidate.

**Week 4: September 25**

Read & Review:

https://mitpress.mit.edu/prehistory-cloud
https://muse.jhu.edu/book/41681
Week 5: October 2

Read & Review:

http://politybooks.com/bookdetail/?isbn=9781509504862

Week 6: October 9

Note: Site visit to the Google office, 10, N Livingston St, Madison, WI 53703 (at East Washington) where we will be hosted by computer scientist Florentina Popovici.

Read:

https://aeon.co/essays/innovation-is-overvalued-maintenance-often-matters-more

https://medium.com/vantage/the-urban-infrastructural-geography-of-the-cloud-1b076cf9b06e

Week 7: October 16

Note: Meetings with the Director of Planning (Adam Sayre) and the Director of Public Works (Theran Jacobson), City of Verona, WI. We will be discussing their perspective on the Epic Systems campus, and the role of Epic in transforming Verona, as well as Verona’s role in servicing and supporting Epic.

Read:

**Week 8: October 23**

**Note**: Guided tour of Epic Systems in Verona, followed by independent small group exploration of Epic campus. The guided tour begins at 3:00 pm and lasts one hour. The independent exploration will last from 4-5 pm. Details to follow.

**Read:**

http://www.motherjones.com/politics/2015/10/epic-systems-judith-faulkner-hitech-ehr-interoperability/

**Week 9: October 30**

**Read & Review:**

https://mitpress.mit.edu/books/fabric-space
https://muse.jhu.edu/book/35772
**Week 10: November 6**

**Note:** This week will involve site visits to the Wisconsin Institutes for Discovery and the Wisconsin School of Business to learn more about the development and/or reorganization of physical space to facilitate new forms of knowledge production, enhanced learning gain, and new subjectivities. Readings TBC.

**Week 11: November 13**

**Read & Review:**

[https://www.dukeupress.edu/fungible-life](https://www.dukeupress.edu/fungible-life)

**Week 12: November 20 -- Project Drop-In Session**

**Note:** Project drop-in session – come to Room 346, Science Hall.

**Week 13: November 27**

**Note:** the class will involve detailed case studies of Qatar (by Danya Al Saleh, PhD student, UW-Madison) and Singapore (by Kris Olds). Danya will be visiting the class, presenting, and dialoguing with us for half of the class time.

**Read:**

**Week 14: December 4**

*Note:* This session will consist of a role-playing exercise related to the impact of the Airbnb platform on cities. A de-brief stage will follow the exercise. Detailed guidelines and some preparatory reading will be provided several weeks ahead of Week 14.

**Week 15: December 11**

*Note:* Following a lecture & discussion, we will visit the College of Letters & Science Learning Support Services unit to learn about a new open text publishing platform.

**Read:**

**Recommended:**

**Assessment**

- Book Reviews (4): 40%
- Research Project/Website: 40%
- Class Participation: 20%

**Book Review Note:** To facilitate learning and learning-oriented discussions, all students are *required* to prepare a book review for each of the *four* assigned course books.

There are many different models to adopt when developing book reviews, and I will outline these when we first meet. I also recommend that you collect and read a sample of book reviews in journals such as the *International Journal of Urban and Regional Research*, *Urban Studies*, and *Urban Affairs Review*.

**The book reviews need to be completed by 12:00 noon on the Mondays before we meet.** I will be creating a UW-Madison Dropbox for you to upload the file. Please ensure that you:

1. Save the file in PDF format only
2. Save the file like this: FAMILYNAMEreviewABULUGHOD.pdf
3. Upload to the Dropbox site I will give you access to.

I will then merge these files and send out the compilation of reviews to everyone in the class.

The book reviews are required because they help spur on discussion, facilitate the “participation” of relatively quieter people, force you to complete reading the book on time, and enable everyone to take something away from class for their files. Let me assure you that students love reading their colleagues’ book reviews – everyone has a different insight on each book, yet some commonalities and points of consensus often emerge as well. The capacity to write regularly (it gets easier over time, believe me!) is also worth developing.

In addition, two people will be assigned responsibility to help facilitate discussion with me during the four book weeks. The facilitators are required to send me (via email) some prospective discussion questions by 6:00 pm on the day before the class (i.e. Sundays). I will merge these discussion questions with my questions, and bring along a list of discussion questions to each class on a 1-2 page handout. Anyone in the class is permitted to send me questions too – just do so by the above deadline (i.e. 6:00 pm on Sundays).

Research Paper/Website Note: A research paper or website should be developed on a relevant topic of your choice. The papers can be on theoretical, methodological or substantive issues. Research papers should be no more than 4,000-6,000 words. Please see me if you have any questions about the topic, and see the Writing Center’s Writer’s Handbook for additional guidance:

Students wishing to develop a website should talk to me about your plans so we reach consensus about the format and structure of the planned site.

The final paper is due no later than midnight on Friday 15 December.

Code of Conduct: Please review the UW-Madison guidelines regarding Academic Integrity: https://conduct.students.wisc.edu/academic-integrity/

Plagiarism is a serious offense and can damage your grade, career plans, and self-esteem. Please don’t take the risk – it’s not worth it!
